

AI Systems for Reducing Operational Costs

Who We Are

FermanIQ specializes in developing tailored AI solutions designed to meet the unique needs of each client's business. Our custom build AI Systems are helping companies to unlock data driven insights, and help the companies in their decision making capabilities. Our insights have shown that companies using AI have increased productivity, revenue and customer satisfaction level.

Challenges Organizations Like Maersk Faces

- Their logistics operations involve complex coordination and documentation, which can lead to inefficiencies and delays in service delivery.

How FermanIQ Helps

- Automated document processing that reduces paperwork handling time by 50%.
- AI agents that streamline logistics coordination, saving 20 hours/week.
- Chatbots that handle 70% of customer inquiries, allowing teams to focus on high-value tasks.

Results / Outcomes (Representative)

- 30% reduction in logistics processing time through automated workflows
- 15 hours/week saved in supply chain coordination tasks with AI agents
- 40% faster processing of routine administrative tasks

Next Steps
